

Deloitte Technology Fast 50 Award: EcoG is one of the fastest growing tech companies in Germany

EcoG has been honored with the [Deloitte Technology Fast 50 Award](#). With this award, the consulting and auditing company Deloitte honors the 50 fastest growing companies in the tech industry every year. The decisive factor for this success is the EcoG | OS control solution and operating system, which enables charging station manufacturers such as Siemens or i-Charging to develop DC charging stations for electric vehicles quickly and cost-effectively. Within just over two years, EcoG has thus achieved a market share of 10% in Europe. With EcoG | OS, EcoG is already making a valuable contribution to the mobility transition in Europe and India.

With EcoG | OS and EcoG's expertise, already active or also future manufacturers of charging infrastructure can easily enter DC charger production by halving the time to market and significantly reducing the development risk. In doing so, the reference architecture (blueprint) and the so-called starter kit help customers to substantially streamline the process to obtain tailor-made DC chargers. The solution can be used modularly as hardware-software or software-only solution. This has already been implemented for more than 24 different charger series from over 15 different manufacturers. In an ecosystem with more than 50 partners, this also opens up countless options for individual product implementation.

From [Jörg Heuer](#), CEO of EcoG:

"We feel very honored to be part of the Deloitte Fast 50. With EcoG | OS, we are professionalizing the development of individual DC charging stations and making the core technology widely accessible. In just over two years, we have become the market leader in this area and are enabling the rapid scaling of e-charging infrastructure production to keep pace with the mobility transformation. With EcoG | OS, we are making e-charging more integrated, scalable, sustainable and profitable."

From [Oliver Salzmann](#), Deloitte Partner and Managing Director of Deloitte's KI GmbH:

"We have been honoring innovative and fast-growing companies for 20 years now and every year I am amazed at how much creativity there is in Germany. The award winners show how it is possible to take up current trends and turn them into viable business models. I congratulate all winners on their outstanding performance."

About EcoG

EcoG is a global IP and tech company working on the rapid expansion of sustainable charging infrastructure for electric vehicles. With its charge controllers, reference designs and software, it enables companies to get products & services to market quickly and scale profitably.

EcoG is already the market leader in Europe with more than 15% market share and a strong footprint in the Indian and North American markets. Overall, EcoG grew four times faster than the market last year. Industrial giants such as Siemens or one of the world's largest service station equipment suppliers are among its customers. The company continues to grow in 2024 and as a next step invests 14,4M\$ in its North American HQ in the USA.
